Denise Meyer

Denise Meyer

Administrative Assistant, Patient Care Services

Denise's children are fourth generation Calaveras County residents. Her grandmother graduated from nursing school and joined Mark Twain Hospital.

"I take personally the concerns that patients and their families have, and I attempt to provide a rapid response and resolution. Personal caring can often make a substantial difference in how people feel. Follow through is essential, because people need to know the health care processes including how our privacy regulations can seem to present barriers."
